

Ukogi: Natural Support for Balanced Cortisol and Stress Response

Eleuthero, a potent adaptogen, is known for its ability to help the body adapt to stress by supporting adrenal function and regulating cortisol levels, the primary hormone involved in the stress response. Research indicates that adaptogens like Eleuthero can help normalize the body's production of cortisol, promoting a balanced response to stress and reducing the negative effects of chronic stress, such as fatigue and energy fluctuations.*1

"I take the Sun Ukogi daily. I find that it helps my stress during the day but also really helps my concentration and mental focus. As an athlete and competitive runner I would not want to be without it. And I recommend it to athletes who consult with me as part of their conditioning and endurance program. It helps the body utilize the oxygen in the body more efficiently. I recommend taking the Sun Ukogi before and after workouts; as well as for the mid-morning or mid-afternoon slump that hits most people at work."

—David Nelson, Ph.D.,
Encinitas, CA

SUN UKOGI

RECHARGE • RESTORE • BALANCE®

Rejuvenate your body with nature's most powerful adaptogen. The principal constituents found in eleuthero (*Eleutherococcus senticosus*), called Eleutherosides, in Sun Ukogi work to bolster your body's natural defenses, helping you maintain overall health and well-being. Make Sun Ukogi a part of your daily routine to recharge, restore, and balance your life, so you can feel younger, stronger, and more vibrant every day.*

REVITALIZE WITH THE WORLD'S FINEST NATURAL ADAPTOGEN

What is Sun Ukogi?

Experience the natural energy and vitality of Sun Ukogi, the premier organic adaptogen supplement designed to help you navigate the demands of modern living. Rooted in ancient herbal practices, Sun Ukogi supports your well-being without the side effects of caffeine or artificial stimulants. For thousands of years, traditional Eastern cultures have enjoyed eleuthero for its restorative benefits.*

Why Choose Sun Ukogi?

A Tried and True Method for Balance

With a rich legacy of health and vitality, Sun Ukogi is more than a supplement. Our eleuthero is sourced from the remote wilderness of Asia, where it thrives in rich, organic soil, free from chemicals and pesticides. Unlike commercially cultivated varieties, Sun Ukogi is harvested from the potent root of the eleuthero plant, ensuring an unmatched purity.

A Natural Approach to Energy

Each serving of Sun Ukogi delivers 2.5mg of Eleutherosides B & E, the active compounds that make eleuthero one of nature's most powerful adaptogens. These compounds work with your body to help you adapt to stress, providing a natural boost to energy levels while supporting your body's natural defense system.*

A BETTER CHOICE

Sun Ukogi vs. Caffeine

Sun Ukogi offers USDA Organic, Non-GMO, and Gluten-Free support with 2.5mg of naturally occurring Eleutherosides B & E per serving. Unlike caffeine, which can lead to jitters, sleeplessness, and energy crashes, Sun Ukogi naturally invigorates the body without unwanted side effects. It supports physical and mental performance, reduces fatigue, enhances mental clarity, and promotes a sense of calm. While caffeine may provide a short-term boost, it lacks the holistic benefits of a natural adaptogen like Sun Ukogi.*

Suggested Use

For optimal results, take 12 tablets of Sun Ukogi daily. Each dose is carefully crafted to provide you with consistent, balanced energy and overall well-being.* Keep out of the reach of children.
